Signature Panels

## Prime Vinyl Guard (PVC)

Our graphics quality cards are manufactured with the highest quality materials that provide an exceptional surface for your printing applications. Examples include photo identification cards, insurance cards, hotel key cards, membership cards, gift cards, and loyalty cards.

## DuraGuard (PVC/PET)

NewGuard composite cards are manufactured with a proprietary blend of PVC and PET, which produces an industry leading long-life card. These cards provide a far greater number of flexes than PVC without fracturing, splitting, or breaking. We produce several types, including a 5, 8, and 10-year extended life card.

## ReNewGuard

**Ecologically Friendly Card Products including PVC and Other Renewable Materials.**

Recycled PVC Cards

Paper/Board Cards

Bamboo and Wood Cards

Continued R&D for more renewable materials and processes to help keep waste out of the landfill.

## TechGuard

**RFID & Prox Cards for Secure Identification, Access Tracking and More.**

TechGuard proximity cards, swipe cards with Mag Stripe and Fobs with RFID/NFC. The card technology will vary, the application is the same; to securely grant or restrict access, track time and other usage.

" We use only the highest quality core and overlay materials for a premium card construction, and manufacture to ISO and ANSI standards. We are proud to serve some of the most distinguished names in the plastic card and OEM card printer industry. "
